

New Tech High School Considerations

Please read through the three articles that are located in the resource section in the file named "New Tech High School." They are from yesterday's local paper and cover a new model of school that the local school corporation is considering.

You will then be going to the message center in the class OnCourse page and clicking on the forum titled "New Tech High School." Inside you should have the chance to post a message or to reply to my message. Once you have read them all please share your overall impressions about the articles and what is being proposed. Next share whether or not you would want to teach in such a school and why you feel that way. Next, what do you think about the technology usage in the school? Lastly, what do you see as the potential downsides to such a plan?

Once others have had the chance to share their thoughts as well, please respond to three of your classmates. To give others time to process your thoughts and to respond, please post your initial ideas by Monday. We'll debrief this whole experience next week in class and see what you thought. If you have any questions, please feel free to write me at jestryck@indiana.edu
